PA

## ABOUT ELYSSA

Elyssa joined the HOAF team in September 2023 and sees patients at The Lodge. Every day Elyssa is motivated by her patients and strives to ensure that each patient experiences acknowledgment and attentive listening.

“It is important to me that both my patient’s physical and emotional needs are met. It is such a gift to be invited into their lives in this way and I want them to feel supported and empowered at every step.”

Elyssa graduated from Saint Francis University in 2022 with her Bachelor of Science and a minor in social work. She went on to obtain her masters of Physician Assistant Sciences in July 2023. Her areas of special clinical research interest include colon and lung cancer. Elyssa is also a member of the Advanced Practitioner Society for Hematology and Oncology.

When not in the office, you can find Elyssa playing lacrosse or working her way through her pile of books to be read.
